Search For An Application

Last Modified on 08/03/2022 2:14 pm PDT

Go to **Applications** and then select the *filter* icon.

Use a filter to identify and locate an application. Alternatively, use the quick search at the top and start typing to see the applications that match either the Application ID or Business Name.

The search options for the filter are provided in the table below. You can add multiple search criteria to identify a group of applications or a specific application. Once an application is identified, click it to view the **Application Details**.

Search Options

Field	Description
DBA Name	The business name is also known as the DBA (Doing Business As). The DBA will be used when processing transactions and appear on the cardholder statement.
Approved Legal Name	The state registered entity name the business is operating under.
Application Legal Name	The entity name with which the business applied.
Merchant ID	The Merchant ID or MID is the account number assigned by Maast to the account. *Note: Applications that Maast has not yet approved will not have a Merchant ID.*
Application ID	The Application ID is the application number assigned by Maast.
Creation Date	The date the user created the application.
Submission Date	The date the application was submitted to our Underwriting Team.
Credit Decision Date	The date our Underwriting Team made a decision about the application.
Application Status	The current application status.
Channel ID	Maast supports targeting applications to a specific vertical. The selection of the channel ID will allow a search based on different verticals.
Sales Rep	All partner users can be assigned as sales representatives.
Created By	The user who created the application.
Clickthrough	Filter applications based on whether a clickthrough exists or not.
Termination Node Name	Maast supports reporting hierarchy in which you and your merchants are placed. The termination node name is the reporting hierarchy assigned to the application. It appears in the *Application Overview* of the Application Detail.
Application Type	Filter on the three application types: EFT, Partner, or Merchant.
